1. Which one of the following statements about agile approaches to developing products is true?

1 / 1 point

○ They are iterative but not incremental.

◉ They are iterative and incremental.

○ They are not iterative and not incremental.

○ They are incremental but not iterative.

✓ **Correct**

This is covered in Agile Overview.

2. Which one of the following statements is true?

1 / 1 point

○ The scientific method usually does not involve iterations.

○ The scientific method does not apply to teams.

◉ The scientific method is similar to the "plan, do, check, act" method of improving business processes.

✓ **Correct**

This is covered in Agile Overview.

3. Which one of the following statements is true? **1 / 1 point**

○ The feature batch size in waterfall project management is usually very small.

◉ In agile project management, planning is distributed throughout the life of the project.

○ Waterfall projects usually have shorter iterations than agile projects.

✓ **Correct**
This is covered in Agile Overview.

4. Which one of the following statements about Jira's hierarchy is true? **1 / 1 point**

○ An application can contain only one project.

◉ An application contains projects, which contain issues.

○ A Jira issue contains projects.

✓ **Correct**
This is covered in Jira Overview.

5. Which one of the following statements about Jira projects is true? **1 / 1 point**

◉ A project template can be selected when creating a project.

○ Issues will automatically be created when creating a project.

○ Project templates are also called fields.

✓ **Correct**
This is covered in Jira Overview.

6. Which one of the following statements about Jira settings is true? **1 / 1 point**

○ A change to a setting always applies to all projects.

○ The scope of what a setting applies to depends on which level of the Jira hierarchy that you are in.

○ A change to a setting always applies only to a specific project.

✓ **Correct**

This is covered in Jira Overview.

7. Why are there multiple columns in an agile board?   **1 / 1 point**

○ One column for each team member.

○ One column for each work item.

● One column for each step that a work item goes through.

✓ **Correct**

This is covered in Visualizing Work- Boards.

8. On a board, what happens when you move an issue from one column to another?   **1 / 1 point**

○ The issue's workflow changes.

○ A new issue is created.

● The value of the issue's "status" field changes.

✓ **Correct**

This is covered in Visualizing Work- Boards.

9. When you are adding a column to a board, what must be associated with the column?   **0 / 1 point**

● A workflow.

○ An issue.

○ A status.

> **!** **Incorrect**
>
> This is covered in Visualizing Work- Boards.

10. Which one of the following statements about the kanban method is true?   **1 / 1 point**

⦿ A key principle is to limit work in progress.

○ It is not related to agile.

○ You must create new team roles to implement kanban.

> ✓ **Correct**
>
> This is covered in Kanban Overview I.

11. When a kanban team member is ready to work on a new issue in the standard Jira kanban workflow, which one of the following is usually true?   **1 / 1 point**

⦿ The issue at the top of the "selected for development" column is pulled to the "in progress" column.

○ Any issue from the backlog is pulled to the "in progress" column.

○ A planning meeting should be called.

> ✓ **Correct**
>
> This is covered in Kanban Overview I.

12. Which one of the following statements about a kanban backlog is true?   **1 / 1 point**

⦿ It can be changed at any time.

○ It should only be changed during certain time windows.

○ It should not be changed.

Correct

This is covered in Kanban Overview I..

13. Which one of the following statements about work in progress limits is true?   **1 / 1 point**

- ◯ They slow down the flow of the process.

- ⦿ They help the team continuously improve.

- ◯ They should be set for every status.

✓ **Correct**

This is covered in Kanban Overview II.

14. An airport deli provides two choices- you can buy a prepared sandwich from the refrigerator or you can order a sandwich at the counter and have it prepared for you. From the perspective of preparing the sandwich, which uses a pull system?   **1 / 1 point**

- ◯ Both the refrigerator and the counter.

- ◯ The refrigerator only.

- ⦿ The counter only.

✓ **Correct**

This is covered in Kanban Overview II.

15. Which one of the following statements is true?   **1 / 1 point**

- ⦿ A cumulative flow diagram shows the number of issues in each status over time.

- ◯ A cumulative flow diagram should ideally trend down over time.

- ◯ Cycle time is the time from issue creation to issue completion.

✓ **Correct**

This is covered in Kanban Overview II.
